

WOODLANDS

Positions in the Forest Products Industry

WOODLANDS MANAGER

Woodlands Superintendent, woodlands supervisor, senior woodlands manager

This unit group includes managers who plan, organize, direct, control and evaluate the operations of establishments in forestry and logging.

KEY RESPONSIBILITIES

Managers in natural resources production perform some or all of the following duties:

- Oversee and analyze operations in forestry, logging, or services to the logging industry.
- Recommend operational changes to senior management when necessary to ensure that production quotas and procedures are met
- Prepare production reports for review by senior management
- Confer with other managers to set production quotas, to plan extraction sites and to develop policies for the removal of raw materials
- Evaluate efficiency of production sites to determine adequacy of personnel, equipment and technologies used, and make changes to work schedule or equipment when necessary
- Ensure adherence to safety regulations
- Hire personnel and oversee training needs of staff
- May direct peripheral activities such as the construction of access roads or temporary living quarters.

EDUCATION AND TRAINING

Forestry managers usually require a bachelor's degree in forestry science or forest engineering. Several years of experience in a supervisory occupation in the particular industry are usually required and may substitute for formal education requirements.
